

Use *kaggle.com* Hubway Data To Calculate Bike Sharing Usage KPIs

Practical Exam

Goal

kaggle.com provides monthly exports of Hubway bike sharing trip records:

- <https://www.bluebikes.com/>
- Latest Full Dumps: <https://www.kaggle.com/acmeyer/hubway-data>

```
"tripduration","starttime","stoptime","start station id","start station name","start station latitude","start station longitude","end station id","end station name","end station latitude","end station longitude","bikeid","usertype","birth year","gender"

```

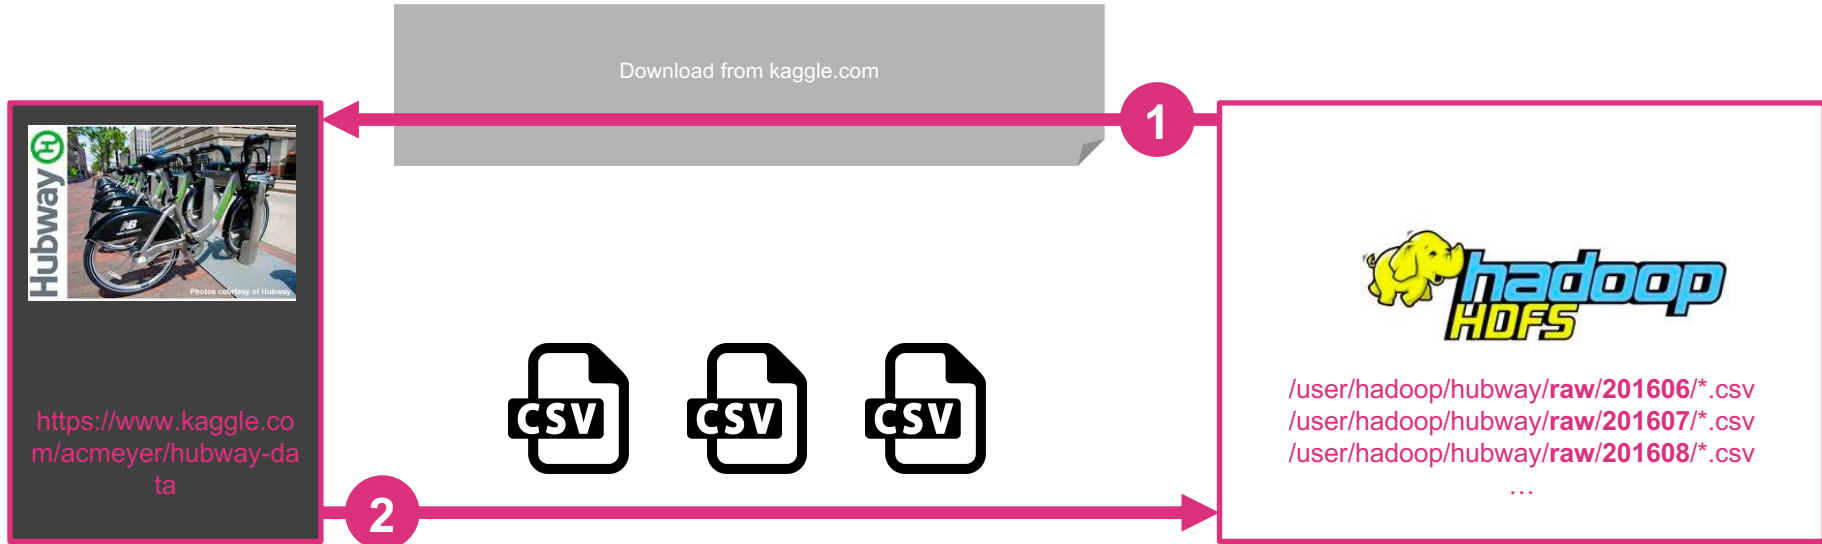

Goal

We want to make use of this data to calculate some Usage KPIs.

Workflow:

- **Gather data** from <https://www.kaggle.com/acmeyer/hubway-data>
- **Save raw data** (*CSV files*) to HDFS (partitioned by YYYYMM)
- **Optimize, reduce** and **clean raw data** and save it to **final** directory on HDFS
- **Calculate KPIs** and **Export** them to an **Excel File**
- The whole data workflow **must be implemented** within an ETL **workflow tool** (e.g. Pentaho Data Integration or Airflow) and **run automatically**

Dataflow: 1. Get Hubway Bike Sharing Data

Dataflow: 2. Raw To Final Transfer

/user/hadoop/hubway/**raw**/201606/*.csv
/user/hadoop/hubway/**raw**/201607/*.csv
/user/hadoop/hubway/**raw**/201608/*.csv
...

1

- move data from *raw* to *final* directory
- **optimize** and **reduce** data structure for later query purposes if necessary
- remove duplicates if necessary
- ...

/user/hadoop/hubway/**final**/201606/*
/user/hadoop/hubway/**final**/201607/*
/user/hadoop/hubway/**final**/201608/*
...

Dataflow: 3. Calculate And Export KPIs

/user/hadoop/hubway/final/201606/*
/user/hadoop/hubway/final/201607/*
/user/hadoop/hubway/final/201608/*
...

1

- calculate KPIs and export them to Excel
- use *Hive*, *Spark* or *PySpark*

Dataflow: 4. KPIs To Calculate

Calculate per Month:

- Average Trip Duration (in minutes)
- Average Trip Distance (in km)
- Usage Share by gender (in percent)
- Usage Share by age (in percent)
- Top 10 most used bikes
- Top 10 most start stations
- Top 10 most end stations
- Usage share per timeslot (in percent):
 - 00:00-06:00
 - 06:00-12:00
 - 12:00-18:00
 - 18:00-24:00
